

Risk Tolerance Questionnaire (RTQ)

The Risk Tolerance Questionnaire is designed to help you assess your client's risk tolerance and investment objective. The first six questions of the RTQ are assigned numerical weights to reflect each one's comparative importance in overall risk determination. Completing the questionnaire in its entirety will allow you to better evaluate your client's profile.

Client Name: _____ Advisor Name: _____

Statement of Investment Selection (SIS) Number (Optional): _____

WEIGHT

35% 1. This graph shows the potential range of gains or losses of a \$100,000 investment in each of seven hypothetical portfolios at the end of a one-year period. The number to the right of each bar shows the best potential gain for that portfolio, while the number to the left of each bar shows the worst potential loss. Given that this is the only information that you have on these seven hypothetical portfolios, which one would you choose to invest in?

1	Portfolio A	64	Portfolio E
22	Portfolio B	78	Portfolio F
36	Portfolio C	93	Portfolio G
50	Portfolio D		

5% 2. Inflation (rising prices for goods and services) can have a significant effect on your investments by decreasing their potential purchasing power over time. Aggressive investments have historically outpaced inflation over the long run, but have had more instances of short-term losses than more conservative investments. How do you feel about inflation and its impact on your investments?

- 15** You are satisfied with your investments keeping pace with inflation. Limiting the potential for short-term loss is your main goal, and you are willing sacrifice the potential for higher returns.
- 50** You would like your investments to outpace inflation. You are willing to assume some potential for short-term loss in order to achieve that goal.
- 85** You prefer that your investments significantly outperform inflation. You are willing to assume a greater potential for short-term loss in order to achieve that goal.

5% 3. Suppose that a substantial portion of your investment portfolio is invested in stocks. If the stock market were to experience a prolonged down market, losing 50 percent of its value over a three-year period, what would you do (assuming your stocks behaved in a similar fashion)?

- 10** Sell all the stocks in your portfolio. You are afraid that the stock market is in a downturn and you cannot afford the decrease in value.
- 30** Sell half of the stocks in your portfolio. You think that the market may rebound, but you are not willing to leave all of your investment exposed to further loss.
- 60** Hold the stocks in your portfolio. You understand that your investment may be subject to short-term price swings and are comfortable "weathering the storm."
- 90** Buy more stocks for your portfolio to take advantage of their low price. You are comfortable with market fluctuations and assume that the stocks will regain their previous value or increase in value.

5% 4. Once again, assume you have a substantial portion of your investment portfolio in stocks. If the stock market were to gradually decline at an average of two percent per month, eventually losing 22% of its value over a year, which of the following would you do?

- 10** Sell the stocks in your portfolio and realize the 22% loss. You wish to avoid the risk of further loss.
- 30** Sell half of the stocks in your portfolio. You are not willing to leave all of your investment at risk for further loss.
- 60** Do nothing. You are comfortable waiting for the stocks to regain their previous value or to increase in value.
- 60** Invest more now because stocks are selling for approximately 22% less than they were 12 months ago. You believe that the stocks will regain their value or possibly appreciate even higher over the long term.

Risk Tolerance Questionnaire (RTQ)

- 10%** 5. Aggressive investments have historically provided higher returns while exhibiting greater short-term price fluctuations and potential for loss. How do you feel about fluctuations in the value of your portfolio?
- 15** You want to minimize the possibility of loss in the value of your portfolio. You understand that you are sacrificing higher long-term returns by holding investments that reduce the potential for short-term loss and price fluctuations.
- 50** You can tolerate moderate losses in order to achieve potentially favorable returns.
- 85** You can tolerate the risk of large losses in your portfolio in order to increase the potential of achieving high returns.

- 40%** 6. What is the investment time horizon on your investable assets?

- 1** Less than 3 years
- 30** 3-5 years
- 60** 6-9 years
- 85** 10+ years

7. What is your current Annual Household Income?

None	\$250,001-\$500,000
\$0-\$30,000	\$500,001-\$1,000,000
\$30,001-\$50,000	\$1,000,001-\$3,000,000
\$50,001-\$100,000	More than \$3,000,001
\$100,001-\$250,000	

8. What is your Approximate Net Worth?

Less than \$250K	\$3M-\$5M
\$250K-\$500K	\$5M-\$10M
\$500K-\$1M	\$10M-\$20M
\$1M-\$3M	More than \$20M

9. What are your Income Needs from Portfolio Assets?

None	\$10,000 Per Year	\$20,000 Per Year
\$30,000 Per Year	\$40,000 Per Year	\$50,000 Per Year
\$60,000 Per Year	\$70,000 Per Year	\$80,000 Per Year
\$90,000 Per Year	\$100,000 Per Year	More than \$100,00 Per Year

10. What is your State Tax Bracket?

0%	1%	2%
3%	4%	5%
6%	7%	8%
9%	10%	Over 10%

11. What is your Federal Tax Bracket?

0%	28%
10%	33%
15%	35%
25%	

Risk Tolerance Questionnaire (RTQ)

RTQ Scorecard

Use this scorecard after completing the Risk Tolerance Questionnaire. Multiply the point values associated with each answer by the question's numerical weight. The total point score is then used on the Point Scale below to determine the client's Risk Tolerance.

Scorecard

	SCORE	X	WEIGHT	=		SCORE	X	WEIGHT	=
Question 1	X		0.35	=	Question 2	X		0.05	=
Question 3	X		0.05	=	Question 4	X		0.05	=
Question 5	X		0.10	=	Question 6	X		0.40	=
					Total Point Score	=			

Point Scale	Investment Objective	Risk Tolerance
1 through 20	Capital Preservation	Conservative
21 through 40	Current Income	Moderately Conservative
41 through 60	Balanced	Moderate
61 through 80	Capital Growth	Moderately Aggressive
81 through 100	Maximum Growth	Aggressive
